

THE GREEN ROOM

CLINIC

DERMAL FILLERS

FROM £199

Dermal Fillers are an effective solution for reducing wrinkles, adding volume, and revitalising the skin. Based on Hyaluronic acid—a naturally occurring substance in the body—Fillers work by boosting the skin's own supply of Hyaluronic acid. This enhances hydration and volume, resulting in a more youthful and natural appearance.

CRYOTHERAPY

FROM £99

Cryotherapy is a cutting-edge procedure that utilises extreme cold to destroy unwanted tissue. This highly effective treatment can address various skin lesions, including warts, moles, skin tags, verrucas, and more. At The Green Room, we offer advanced Cryotherapy treatments to help you achieve flawless skin with minimal discomfort and downtime.

HAYFEVER INJECTION

FROM £130

The Kenalog injection is a steroid treatment specifically designed for those with severe allergies to pollen. If traditional antihistamines, nasal sprays, and tablets have not provided sufficient relief, the Kenalog injection might be a suitable option. Kenalog is a corticosteroid injection that helps calm the body's immune response to allergens.

POLYNUCELOTIDES

FROM £125

Polynucleotides are an innovative injectable bio-stimulator crafted from purified DNA fragments. These powerful treatments are designed to boost the production of collagen and elastin, two essential proteins that naturally decrease as we age. By stimulating fibroblast cells, polynucleotides promote tissue regeneration and restore skin tone and elasticity. They also offer antioxidant and hydrating benefits, alongside bio-remodelling effects.

PROFHILO®

FROM £200

Profhilo® is a groundbreaking skin rejuvenation treatment. Unlike traditional fillers, Profhilo® is a bio-remodelling solution that rejuvenates the skin from within. It contains a high concentration of hyaluronic acid, a naturally occurring substance in the body. Profhilo® works not by filling wrinkles, but by remodelling and revitalising the skin.

ANTI-WRINKLE TREATMENTS

FROM £169

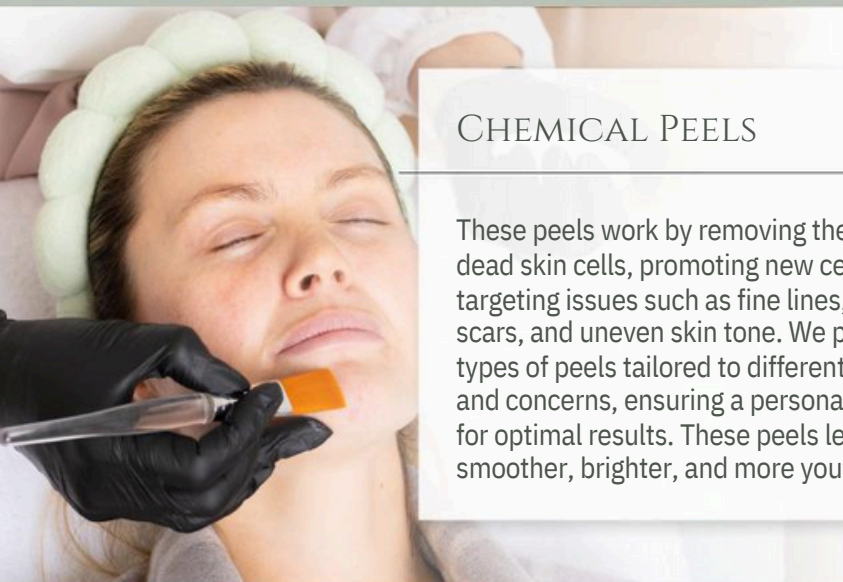

Anti-wrinkle injections use Botulinum Toxin Type A, a purified protein that temporarily relaxes muscles. This relaxation reduces the appearance of lines and wrinkles caused by repetitive facial movements, like frowning or squinting. When these muscles relax, the skin above them smooths out, reducing wrinkles creating a softer, more youthful appearance which typically lasts several months.

SKIN BOOSTERS

FROM £220

Restylane Skin Boosters are a revolutionary approach to nourishing your skin, specifically designed to deliver deep skin hydration. This innovative treatment involves micro-injections of a soft, gel-like substance called hyaluronic acid directly into the skin, acting as an intense moisturiser. Skin Boosters contain a form of hyaluronic acid that absorbs water and brings deep skin hydration to the treated areas. This improves elasticity, firmness, and surface smoothness.

CHEMICAL PEELS

FROM £89

These peels work by removing the top layers of dead skin cells, promoting new cell growth, and targeting issues such as fine lines, wrinkles, acne scars, and uneven skin tone. We provide various types of peels tailored to different skin types and concerns, ensuring a personalised approach for optimal results. These peels leave the skin smoother, brighter, and more youthful-looking.

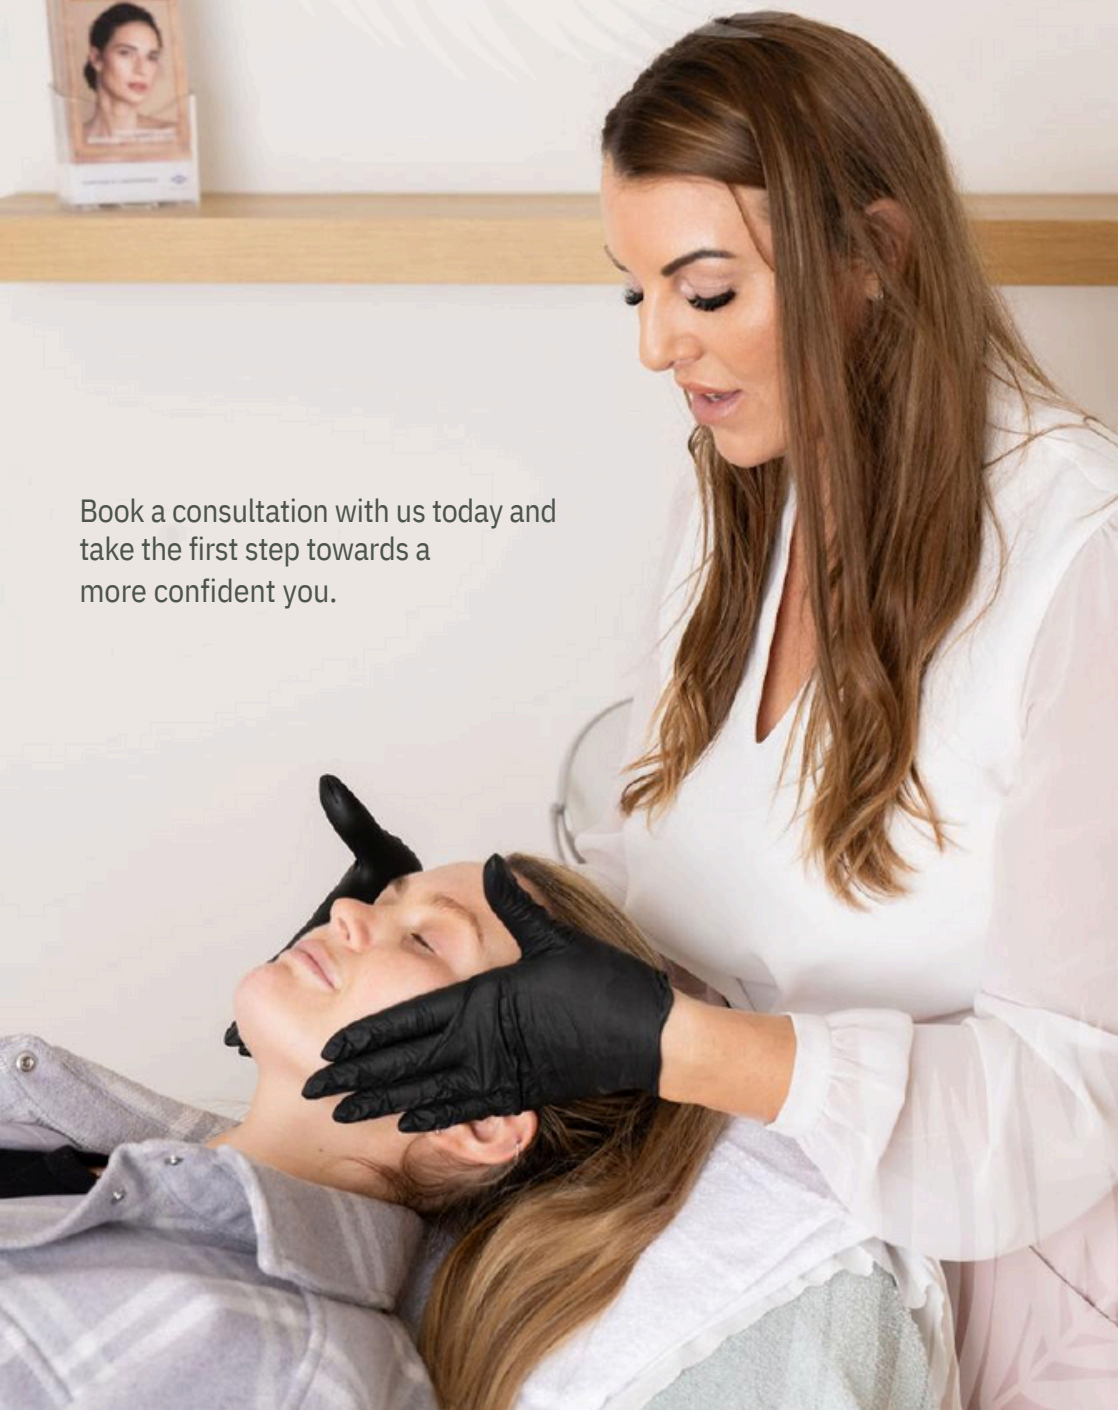

MICRONEEDLING + EXOSOMES TREATMENT

FROM £99

At The Green Room Clinic, we offer microneedling, a gentle and non-invasive treatment meticulously crafted to stimulate collagen production, refine skin texture, and revitalise your complexion. We use the latest, most sophisticated techniques to help you achieve a smoother, more luminous appearance, all while maintaining the natural elegance of your unique beauty.
